Customized Quail Covey Release Sites

Over the years we have come up with the most cost efficient way to get more wild quail on your property. These weatherproof feeders are specially designed for quail only, not other critters, which attract predators. For one set price, which includes quail. Feeders, call bird box, field site set up. This is a proven method, with proven quail developed just for this purpose.

There are many factors that are involved in having a successful quail release program. Habitat, food plots, predator control are all-important keys. I feel with my experience, Hunting club owner, birddog trainer, and 25 years of raising 30,000 plus bobwhite quail I can help you enjoy your land and have some coveys to play with, whether you're a hunter, dog trainer or just love the sights and sounds wild quail on your ground.

The best time to do the releasing is August thru October when there is still plenty of cover and plenty of insects for the young quail to find.

For pricing information and any questions please do not hesitate to call I love to talk quail & birddogs. The best to get a hold of me is cell phone.
